## Benjamin Sauter and David McGill Offer Insight on the SEC's New Digital Currency Oversight

August 14, 2017

Publication: ***Nasdaq Tech***

Last month, the U.S. Securities and Exchange Commission delivered a landmark report of investigation concluding that initial coin offerings (ICOs) — or fundraising via digital coins or tokens — may be regulated under federal securities law. Benjamin Sauter and David McGill, government enforcement defense lawyers who represent clients in trading disputes and other matters involving complex financial technologies, discuss the implications for companies and individuals involved in these and secondary market transactions, and how they can prepare for the risks ahead.

The interview, which was published on *Nasdaq Tech*, can be viewed [here](#).
