Many of our engagements involve matters in which our clients face significant public attention. The following is a list of news stories about the firm, our clients, cases and the results we have achieved.

Daniel Saval Explores Challenges in Cross-Border Cryptocurrency Insolvencies at ABA International Law Conference

May 1, 2023

Many crypto firms – including Three Arrows Capital, Voyager, Celsius and FTX – have become insolvent as cryptocurrency asset values cratered during the “Crypto Winter” of 2022. However, the unusual nature of the crypto industry – with many firms and creditors based outside regulated financial economies, and the asset class being largely unregulated – poses unique challenges for insolvency practitioners, trustees and liquidators. Kobre & Kim’s Daniel Saval, who focuses on complex cross-border insolvency disputes, explores these obstacles at the ABA International Law Section Annual Conference in New York during a session at 11:00 am, May 3, 2023.

The session, “Key Challenges in Cross-Border Cryptocurrency Insolvency Proceedings,” will be moderated by Douglas Curran of Braun Hagey & Borden LLP, and will feature Carla Carriveau of CoinList, Russell Crumpler of Teneo and Peter Hayden of Maurant Ozannes LLP.
