

News

Many of our engagements involve matters in which our clients face significant public attention. The following is a list of news stories about the firm, our clients, cases and the results we have achieved.

Steven Perlstein Discusses Cyber Breach Response Management

October 13, 2015

Partner Steven Perlstein served as a panelist for a program, titled “Under Attack: Cyberdefense in the Network Age,” presented by 100 Women in Hedge Funds. Considering that cyberattacks from foreign nation states, cross-border crime rings, and individual hackers are becoming increasingly sophisticated, the panel discussed the response strategies and protective measures under development by both the private sector and federal government. Mr. Perlstein and his fellow panelists also discussed cyberbreach response management, including civil remedies and litigation strategies post-attack.
